SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measurers

For Overdose Exposure By :

<u>Swallowing</u>	:	If swallowed, do not induce vomiting. CALL PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY.
<u>Skin Contact</u>	:	Remove contaminated clothing and wash contaminated skin with large amounts of water. If irritation persists, contact physician.
<u>Eye Contact</u>	:	Flush eyes with water for at least 15 minutes. CALL PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY.

unconsciousness.

Ingestion : Poisonous if swallowed. Can affect the optic nerve resulting in blindness. Can cause mental sluggishness, nausea and vomiting leading to severe illness, possibly death (in humans).

Acute oral LC50's = 4,700 mg/kg (rats) (Methyl Alcohol)

Eye Contact : May cause eye injury which may persist for several days. Liquid and vapor in high concentrations causes irritation, tearing and burning sensation.

Skin contact : Essentially non-irritating. Repeated or prolonged contact causes drying, brittleness, cracking and irritation.

Dermal LC50's = 20,000 mg/kg (rats) (Methyl Alcohol)

4.3 Indication of any immediately medical attention and special treatment needed

Treat symptomatically. The severity of outcome following methanol ingestion may be more related to the time between ingestion and treatment, rather than the amount ingested. Therefore, there is a need for rapid treatment of any ingestion exposure. Antidote is fomepizole which enhances elimination of metabolic formic acid. This must be administered by a physician only. For specialist advice physicians should contact the Poison Control Centre.

SECTION 5 : FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media : Synthetic Fire fighting foam AR-FFF(3% solution). Dry powder. Carbon dioxide. Water spray. Sand.

Unsuitable extinguishing media : Do not use a heavy water stream. Water may be effective for cooling, diluting, or dispersing product, but may not be effective for extinguishing a fire because it will not cool the product below its flash point. If water is used for cooling, the solution will spread if not contained. Mixtures of the product and water at concentrations greater than 20% product are still considered flammable.

5.2 Special hazards arising from the substance or mixture

Fire hazard : Highly flammable liquid and vapor. Can accumulate in confined spaces, resulting in a toxicity and flammability hazard. Incomplete combustion releases dangerous carbon monoxide, carbon dioxide and other toxic gases. Under fire conditions closed containers may rupture or explode. Flame may be invisible during the day. The use of infrared and or heat detection devices is recommended.

Explosion hazard : May form flammable/explosive vapor-air mixture.

Reactivity : Stable normal conditions.**5.3 Advice for firefighters**Firefighting instructions : Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire-fighting water from entering environment.Protection during firefighting : Fire fighters should wear complete protective clothing including self-contained breathing apparatus.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency proceduresGeneral measures : Remove ignition sources. Use special care to avoid static electric charges. No naked lights. No smoking.**6.2 Environmental precautions**

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters. Methanol's main physical behavior if spilled to water is described as "dissolves/evaporates" in the European Behavior Classification system for chemicals (reported in IMO (2011)). GESAMP hazard profile: methanol does not bioaccumulate and is readily biodegradable in the aquatic environment (IMO2011).

6.3 Method and material for containment cleaning up

Soak up with inert absorbent material and dispose of as hazardous waste. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions and safe handling

- Do not expose children and pets to this material.
 - After handling product, wash thoroughly with soap and water before drinking, eating, or smoking.
 - Keep away from heat, sparks and flame.
 - Containers should be properly bonded and grounded before transferring contents to other containers.
- Use non-sparking tools and explosion-proof equipment when handling flammable liquids.

7.2 Conditions for safe storage, including any incompatibilities

- To prevent possible storage container rupture, do not permit to freeze. Incompatible with strong acids, oxidizers, bases and chromium trioxide, potassium permanganate, and sodium peroxide.
- Store in a cool, well-ventilated area and keep container closed.

8.2 Exposure controls

Control Measures : Handle in the presence of adequate ventilation. Engineering controls should be used whenever feasible to maintain concentrations below acceptable exposure criteria, including enclosures and local exhaust ventilation.

Respiratory Protection : Where exposure is likely to exceed acceptable criteria and engineering controls are not feasible, use NIOSH/MSHA approved respiratory protection equipment. Respirators should be selected based on the form and concentration of contaminants in air and in accordance with OSHA (29 CFR 1910.134)

Protective Clothing : Wear gloves and protective clothing which are impervious to the product for the duration of exposure if there is potential for skin contact.

Eye Protection : Wear safety glasses meeting the specifications of ANSI Standard Z87.1 where no contact with the eye is anticipated. Chemical safety goggles meeting the specification of ANSI Standard Z87.1 should be worn whenever there is the possibility of splashing or other contact with the eyes.
